PROFILE

Aspiring Computer Science student with a passion for programming. Eager to develop innovative projects and explore new technologies. Enthusiastic about collaborating in team settings. Seeking an opportunity to apply technical skills in a dynamic environment.

SKILLS

HARD SKILLS

- Programming languages
(Python, Java, C)
- Web & Software Development
(ReactJS, Tailwind, NodeJS, FLASK, Docker)
- Machine Learning

SOFT SKILLS

- Problem Solving
- Adaptability
- Attention to detail

EDUCATION

Class X

GPA : 9.4

2019 - 2021

TKM CPS

Class XII

GPA : 8.9

2021 - Present

**BACHELOR OF TECHNOLOGY
COMPUTER SCIENCE**

GPA : 7.28

PROJECTS

SAFE-GUARD PRO

[Link](#)

A web-based security software application

- Monitors the device and alerts the user when they are away.
- Active Webcam monitoring and Fall-Back mechanisms implemented.
- Instant Alert upon Intruder Recognition via Mail.

WORKFLOW MANAGEMENT SYSTEM

Freelance Development

- Developed a comprehensive workflow management system Front-end using the MERN stack and Firebase utilities.
- Key features include task assignment to teams, client work tracking, and schedule management.

SOLAR PREDICT

[Link](#)

Weather-Based Solar Power Predictor (Top Hackathon Submission)

- Developed a machine learning model that predicts future power output of solar panels based on various factors, such as weather data.
- Leveraged Pandas, NumPy, and TensorFlow/Keras to build the model and achieved a high level of accuracy.

ACHIEVEMENTS

First Prize Winner of Hackathon

EXTRA CURRICULAR

Solving Leetcode Problems

Freelancing

EXPERIENCE

FREE LANCING

2023 - Present

- Building Web dev Projects
- Drafting Documents
- Project Enhancement
